

ACOUSTRONICALSOUNDSCAPES

altoflute
soprano & tenor-saxophones
fx-pedals
voice

first of all I call it
SOUND
sounding in different kinds,
clouds, smells, tastes and appearances,
like a big bowl of stew

In the interaction of acoustic instruments and electronic/ digital effects, sound-landscapes, musical sound images cloudscapes are created,

freely improvised and/or composed music

CLOUDS SHAPED BY WIND

ACOUSTRONICALSOUNDSCAPES

the music will develop itself according to the event,
place and time, occasion, ambience, surrounding,
landscape

spherical modes, wall-shaking noise
bright, lucid, dark, mythical soundcolours
chilled and smoooth, hard and edgy

deep resonating up to shimmering sounds
cascading through layers of drones
melodies gliding over ambient loops

booking@cloudsshapedbywind.de mobil: 017664303932

like clouds in the sky
like clouds collide
like clouds shaped by wind

music was always around, radio, television, concerts, orchestra.....
I started with the recorder, then tenor horn, clarinet, saxophones,
flute, a bit of guitar, piano.....I even sometimes sing…

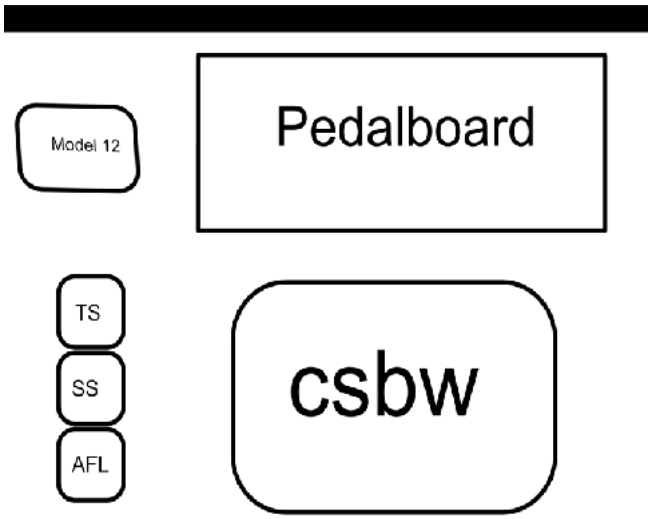

Techrider
